ANNAM POSHAK

8919198584 — annamposhak@gmail.com — LinkedIn — GitHub

Professional Summary

Junior Data Analyst and Computer Science undergraduate with hands-on experience in **Python, SQL, Excel, Power BI, Pandas, and exploratory data analysis**. Skilled in cleaning multi-source datasets, validating data quality, analyzing patterns and KPIs, and building stakeholder-ready dashboards. Improved reporting and preprocessing efficiency through analytical automation.

Technical Skills

Programming & SQL:	Python, SQL, MySQL, Java; data extraction, filtering, aggregation
Analytics & Statistics:	Pandas, NumPy, EDA, Descriptive Statistics, Trend Analysis, Customer Segmentation
Excel & Visualization:	Microsoft Excel (multi-sheet analysis), Power BI, Plotly, Dashboard Development
Data Engineering & QA:	Data Cleaning, Validation, ETL, Data Pipelines, SQL Reconciliation, Source Lineage
Workflow & Tools:	Git, GitHub, REST APIs, OpenAI Codex (AI-assisted development)

Experience

Research Data Analyst **Feb 2026 – Jul 2026**
NetZeroAqua

- Cleaned, transformed, and validated **50+ multi-sheet Excel datasets** with **900+ variables** using Python and Pandas, preparing reliable inputs for environmental and GIS analysis.
- Built interactive **Power BI** and Plotly dashboards and analytical reports, reducing manual reporting effort by **60%**.
- Conducted EDA and market research informed by **20+ research papers**, identifying patterns and presenting findings to support research decisions.

Data Analyst Intern **Nov 2025 – Jan 2026**
Seaweedz Energy Pvt. Ltd.

- Analyzed aquaculture pond datasets with **2,500+ columns** using Python and Pandas to investigate trends, patterns, and inconsistent records.
- Cleaned, preprocessed, and validated large datasets, reducing preprocessing effort by approximately **20%**.
- Produced descriptive statistical summaries and visualizations to communicate results and support aquaculture research.

Projects

Retail Customer Spending & Share-of-Wallet Analysis **Analytics Case Study**
Customer Segmentation, Trend Analysis, KPI Reporting

- Analyzed **444,118 transactions** from **45,000 customers** across 10 retail categories and 5 payment methods to identify spending patterns and customer behavior shifts.
- Quantified a **9.43 percentage-point decline** in card share of wallet (28.91% to 19.48%) and traced the loss primarily to payment-choice changes rather than category mix.
- Segmented customers by silent attrition, payment switching, and spend contraction, framing actionable opportunities for customer retention.

Cricket Analytics and Intelligence Platform **Jul 2026 – Present**
Python, Pandas, SQL, Automated Testing, Data Engineering

- Building a Python/SQL cricket analytics foundation for a **17,980-match source archive** with **10M+ delivery records**, incorporating data lineage and source provenance.
- Implemented automated data-quality tests and SQL reconciliation checks for reproducible delivery, innings, and match-level metrics.
- Developing player-performance, matchup, and scouting analyses to support evidence-based cricket comparisons.

SVLN Engineering – Official Company Website **Jul 2025**
React.js, JavaScript, Node.js, HTML, CSS, REST APIs

- Developed and deployed a responsive company website with reusable UI components and REST API integration; optimized page responsiveness by **25%**.

Education

GITAM University **Aug 2023 – Aug 2027 (Expected)**
Bachelor of Technology in Computer Science Engineering
